# Boluwatife Adeyeye

Software Engineer - Frontend

## SUMMARY

A Software Engineer with a diploma degree in Frontend Engineering and extensive experience in Reactjs and Vuejs. I am a quick learner, a problem solver, and proficient in time management. In my previous projects, I have successfully implemented responsive web design, ensuring that web pages are optimized for different devices and screen sizes, optimizing web page performance, and ensuring fast load times. I have also kept up with the latest trends and technologies in Frontend development and applied them to current projects. I am confident that my skills will contribute to the success of a company that develops innovative technology, where I can effectively contribute to the team's growth and leverage my skillset.

## TECHNICAL SKILLS

- **Markup Languages :** HTML5, CSS3
- **Programming Language :** JavaScript (Typescript)
- **JavaScript FrameWorks :** ReactJs, Vuejs
- **Css Framework :** Bootstrap
- **CSS Prepocessor :** SASS
- **API Interaction :** Data Fetching
- **SEARCH ENGINE OPTIMIZATION**
- **Version Control :** Git – GitHub**.**
- **Hosting :** Vercel, Netlify**.**

## SOFT SKILLS

- Analytical Skills
- Outstanding Communication Skills
- Multi-tasking
- Critical Thinking
- Problem Solving Skills
- Team Work
- Avid learner

# PERSONAL PROJECTS

- Designed and developed a portfolio website utilizing React.js, in order to showcase my skills and experience in a professional and visually appealing manner

  https://developstar.vercel.app

- Built a functional calculator with ReactJs. It is capable of performing mathematical calculations. With the ability to perform addition, subtraction, and division, it offers users a quick and easy way to get accurate results in a functional and user-friendly interface.
